

Windows Live Messenger Tab

End User experience:

Tabs are small HTML web pages which can be viewed within the Messenger Client.

The primary content of the tab is HTML content called by a particular URL; the HTML is served from a partner's (3rd party) servers. Individual tab partners or providers maintain and host all tab content. A tab may consist of more than one web page or "tab page"; these tab pages must be sized accordingly.

Please contact msnfiad@microsoft.com for more information and creative specs.
